**Notice ID: 341**

**Posting Date: September 17, 2026**

**Planned Maintenance Event – Header System Maintenance**

Leaf River Energy Center ("LREC") notifies its customers of upcoming planned maintenance on its header system that will commence at 9:00 am CPT on Tuesday, November 17, 2026, and is expected to continue until 9:00 am CPT on Wednesday, November 25, 2026.

The maintenance work will impact the availability of firm and interruptible services for injections into storage and withdrawals from storage. Specifically, FSS Storage injections, withdrawals and PAL services will be unavailable. During this time, Wheeling services will continue to be available. These measures are necessary to facilitate critical infrastructure improvements and enhance operational reliability.

The current schedule for this planned service outage and its anticipated impacts are subject to change, so please monitor critical notices for any updates. Shippers are encouraged to contact their Transportation or Marketing Representative with any questions regarding how these changes may affect their operations.
