

- Beginning Gas Day 21 through Gas Day 23 Spire Storage West will be conducting planned maintenance to relocate electrical equipment at its Clear Creek storage facility causing the plant to go offline. Belle Butte will service all customer requests but it will be limited to 280,000 Dth/day of receipt capacity and 120,000 Dth/day of delivery capacity. A full return to service is expected for Gas Day 24. We will continue to share updates as information becomes available.
- Beginning Gas Day 26 through Gas Day 29, Spire Storage West will be conducting planned maintenance to update its distributed control system (DCS) at its Belle Butte storage facility causing the plant to go offline. Clear Creek will service customer requests but will be limited to receipt and delivery capacity of 50,000 Dth/day. A full return to service is expected for Gas Day 30. We will continue to share updates as information becomes available.
  - o Note – that receipt and delivery of gas during this secondary outage will be limited to Kern River Gas Transmission and Northwest Pipeline.

All scheduled maintenance has been completed and all operations have returned to full service.
