

## **Critical Notice**

Date: July 28, 2020

To: Eastern Shore Natural Gas Shippers

Re: Transco Receipt Point Impacts due to Transco Planned Outage (Job #276)

Transcontinental Gas Pipe Line Company, LLC ("Transco") has previously provided Eastern Shore Natural Gas ("Eastern Shore") notice of a planned outage (Job #276) which would take the Transco Hockessin interconnect fully out of service for the period of July 27, 2020 through August 14, 2020. Transco requires a full meter outage to perform necessary anomaly cutouts on the Delaware Power & Light Lateral (Hockessin interconnect between Eastern Shore and Transco).

During this outage window, Eastern Shore may be required to limit daily nominations on Transco if max flow capacity is approached at the Transco Parkesburg Interconnect. The extent of this impact will vary daily and depends on changing operating conditions. Eastern Shore will work directly with any affected shippers as needed.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Marianne Coker  
Manager, Transmission Logistics
