

Update: Current Construction Progress as of 1/16/2024

Golden Pass Pipeline (GPPL) is targeting a commercial in-service date of 3/15/2024 for the Gulf Run Receipt point. At that time, GPPL will begin allowing nominations for the point.

Golden Pass Pipeline will have limited ability to transport a portion of the authorized quantity on a firm or interruptible basis for its existing shippers from the Gulf Run receipt point to available delivery points, subject to, among other things, the limited available line pressure. This partial interim service will be available only until such time as the construction of the full facilities approved in the October 20, 2022 Order is complete and they are placed in-service. Golden Pass Pipeline will provide further information regarding the full in-service date of these facilities as such information becomes available.
