Kinetica Pipeline Conditions on Cameron System

Kinetica is returning to normal operating conditions on the Cameron System. As a result, Kinetica is terminating notice 272 effective with the Timely Cycle for Gas Day 6/8/2015.

To maintain normal operating conditions, all receipt point operators should continue monitoring actual daily receipts into the Kinetica system and ensure they are equal to scheduled quantities.

Customers are strongly advised to monitor the EBB for updates. During business hours, please contact the Gas Scheduling Representatives at (713) 228-3347 ext 420 if you have any questions. For after hours, please contact the on call scheduler (posted on EBB).
