Vector Pipeline™

VECTOR POSTING

***** IMPORTANT OUTAGE NOTICE *** For September 28 – October 2, 2021**

August 5, 2021

To Vector Shippers:

A full pipeline cutout of the 42-inch diameter Vector mainline is required for construction of system enhancement facilities. Vector is installing pig launcher and receiver traps at its Athens Compressor station in Calhoun County, Michigan. These facilities will streamline future cleaning and inline inspection by dividing the longest segment of the pipeline into two smaller segments.

Pipeline Cutout (Milepost 168.9)

Current Schedule: Tuesday, September 28 – Saturday, October 2, 2021

Impacted Segment: Vector mainline at the Athens, Michigan compressor station. Nominations that require transport through the station will be impacted (applies to both westbound and eastbound flows). All receipt and delivery points are available throughout this outage and Vector encourages shippers to utilize secondary paths that avoid flow through Athens Station at milepost 168.9.

This outage may impact Vector's firm service contracts and Demand Charge Credit mechanisms under Vector's FERC (GT&C Section 41) and NEB (GT&C Section 34) Gas Tariffs will apply.

Any inquiries or concerns should be directed to the following Marketing contacts:

Matt Malinowski – Director, Market Development
(734) 276-6189

Dennis Scheibe – Manager, Transportation Services
(734) 210-8481

Vector looks forward to completing this work in a timely manner. Thank you for your understanding and for dealing with any inconvenience this may cause.

If you have any questions or would like the latest update, please contact your Vector representative or monitor Vector's web site www.vector-pipeline.com under "Informational Postings" for any revisions to our outage schedules.
